Objectives

The **Post Graduate Diploma in Capital Market and Investments** is designed to equip students with comprehensive knowledge and practical skills related to the functioning, structure, and instruments of capital markets. The program aims to develop a deep understanding of investment mechanisms, regulatory frameworks, financial instruments, and portfolio management techniques. Through theoretical learning and industry-oriented applications, the course prepares participants to:

1. **Understand the structure and functioning** of capital markets, including primary and secondary markets.

2. **Analyze various investment instruments** such as equity, debt, derivatives, mutual funds, and alternative investments.
3. **Interpret and evaluate financial statements**, company fundamentals, and macroeconomic indicators for investment decisions.
4. **Develop proficiency in trading, settlement, and regulatory compliance** under SEBI and other authorities.
5. **Apply quantitative and qualitative techniques** to investment analysis and risk management.
6. **Build, manage, and monitor portfolios** using modern portfolio theory and asset allocation strategies.
7. **Use tools and platforms** such as Bloomberg, Excel, and financial modeling software for research and analysis.
